

Core-Lube™

Category: Drilling fluids

Core Tube Lubricant

CORE-LUBE™ is a natural, linseed-based soft soap used as a core tube lubricant on diamond core drills.

Applications/Functions

- Facilitate the core sliding into the inner tube
- Lubricate the core lifter
- Minimize wear on the inner tube
- Formulate a non-polluting water-based
- solution for cleaning inner tube components and rig equipment

Advantages

- Improves core recovery
- Extends length of core run in broken ground
- Lengthens useable life of downhole wireline components

Recommended Treatment

As aid in core recovery

- A handful or saturated swab of CORE-LUBE™ may be smeared inside the bottom of the inner tube before it is inserted into the drill rods. Also, a liberal amount may be applied to the core lifter parts.

As a cleaning solution for drill rig components

- Mix one quart of CORE-LUBE™ with 50 gallons of water or 5 litres of CORE-LUBE™ per m³ of water.

Packaging

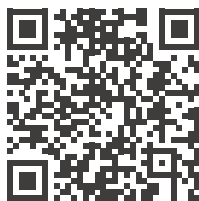

CORE-LUBE™ is packaged in 25-lb (11.4 kg) resealable plastic pails with wire bail handles.
